March 2017 - present, Seattle / Bangalore

Software Developer - Amazon UI

- Building a new templating language and its editor plugins to help devs at Amazon write secure HTML.
- Owned the UI design and implementation of a dashboard, JS error monitoring tool and a documentation platform.
- Collaborated with teams in Jordan to enable right-to-left for our UI components to enable the Amazon UAE launch.
- Worked on Amazon's site-wide redesign, acting as the bridge between our design and dev team.

July 2015 - March 2017, Bangalore

Software Developer - Amazon Fashion

- Part of the inception team for Prime Wardrobe, Amazon's service that enables customers to try on apparels before buying them.
- Lead the ideation of Amazon Spark, a platform to discover things from people who share your interests.

June 2013 - July 2013, New Delhi

Design Intern - Safety Kart

- Product design for a sanitizing spray that now sells in multiple countries.
- Graphic design for advertisement and social media engagement.

Since 2012

Freelance Graphic Designer

- Worked with brands worldwide designing identities, animations and other digital experiences.

I focus on creating functional, meaningful and aesthetic solutions through design and code.
